Database designed for ease of use

Seamless data handling

The OtoAccess® Database enables you to store data and client information. The database is an ideal solution for the small clinic and the large hospital:

- Full product line support. Compatible with all Interacoustics solutions
- Easy to use. The easily implemented and navigated database does away with technical clutter and inefficiency

Clinic optimization

Eliminating the complexity of data handling and the need for pen and paper supports the workflow of a busy clinician.

As such, the OtoAccess® Database leaves more time for patient care, reduces waiting lists and ensures a larger patient throughput.

Centralized data management

You can easily integrate the OtoAccess® Database with EMR and EHR systems, ensuring the seamless transfer of patient records and data.

Scalable

As a solution that can be used standalone or networked, the OtoAccess® Database is scalable, supporting the workflow of all sizes of clinics.

Modern interface

The database has an intuitive interface, ensuring an ease of use and a short learning curve.

This intuitiveness is exemplified by one click features such as performing patient tests and previewing historic sessions.

Streamlining the healthcare profession

Data handling is easy with the OtoAccess® Database. The solution includes automatic backup and advanced logging, supplemented by advanced users and group administration.

Interface with simple navigation

OtoAccess® is our user-friendly database for unlimited storage of measurement data and client information. Supports all Interacoustics products!

Full product line support

Science made smarter

Interacoustics is more than state-of-the-art solutions

Our mission is clear. We want to lead the way in audiology and balance by translating complexity into clarity:

- Challenges made into clear solutions
- Knowledge made practical
- Invisible medical conditions made tangible and treatable

Our advanced technology and sophisticated solutions ease the lives of healthcare professionals.

We will continue to set the standard for an entire industry. Not for the sake of science. But for the sake of enabling professionals to provide excellent treatment for their millions of patients across the globe.
