

 Science made smarter

Bring your clinic to your client

Whether you need
a portable solution
for audiometry,
tympanometry, fitting
or balance assessment,
we can meet
your needs

Interacoustics

Balance

Why depend on the client coming to you?

Interacoustics' portable solutions enable you to treat clients in remote areas, meaning you can provide a flexible service. This gives you the opportunity to increase your customer base and thereby make a difference for more people.

Our portable products are lightweight, easy to set up, fast and only require a minimum of training for optimal use. This makes our products suitable for all types of clinic setups.

Even with limited desk space it will be easy to perform your testing. In just a few minutes you will be ready to do measurements everywhere - even in places with no available power supply. For you and your client's convenience.

The mobile clinic

Would you like to meet your clients where they are?

Promote your clinic to potential clients with a local visual presence

Put your clinic on wheels and reach your clients locally

USB powered

Titan

Tympanometry

- Clinical tympanometer with fast screening

- Highly portable with a weight of 322 grams / 11.36 oz

Bertec® Portable Essential Balance assessment and training

- Customized physical therapy and training according to the specific needs of the patient
- Sensitive dual-balance plate that utilizes normative data to ensure evidence-based practice
- Compact design and USB connection to the laptop

Looking for a portable solution?

Science made smarter

Interacoustics is more than state-of-the-art solutions

Our mission is clear. We want to lead the way in audiology and balance by translating complexity into clarity:

- Challenges made into clear solutions
- Knowledge made practical
- Invisible medical conditions made tangible and treatable

Our advanced technology and sophisticated solutions ease the lives of healthcare professionals.

We will continue to set the standard for an entire industry. Not for the sake of science. But for the sake of enabling professionals to provide excellent treatment for their millions of patients across the globe.
